Godson Kurishinkal Antony

Senior Data Engineer · Analytics Engineering & BI

Dubai, UAE · godson.kurishinkal@gmail.com · +971 50 527 6062 · linkedin.com/in/godsonkurishinkal · github.com/GodsonKurishinkal

SUMMARY

Senior Data Engineer with **6+ years** in UAE data & analytics, engineering supply chain data platforms across retail and logistics. Built dimensional models with **10+ fact tables** and **6+ dimensions**, designed medallion lakehouses (Bronze→Silver→Gold) processing **30,000+ SKUs** daily. Delivered semantic layers and reporting across **50+ dashboards** for **15+ strategic stakeholders**, achieving **87% faster** analytics delivery and **95%+ data accuracy**.

TECHNICAL SKILLS

Languages	Python, SQL (T-SQL, PL/SQL), DAX, M Query
Data processing	Polars, Pandas, DuckDB
Storage	Parquet (Hive-partitioned), SQL Server, Oracle
BI & reporting	Power BI, DAX Studio, Streamlit
Data modelling	Star schema, Kimball, SCD Type 2, medallion architecture
ML / analytics	Scikit-learn, Prophet, statistical forecasting, ADI/CV² classification
Automation	Selenium, PyAutoGUI, config-driven ETL, Git
Domains	Retail, supply chain, inventory optimisation
2026 roadmap	Microsoft Fabric (DP-700), Databricks, Apache Spark, dbt

PROFESSIONAL EXPERIENCE

Landmark Group — Dubai, UAE

Assistant Manager · MIS & Analytics, DC Operations — Dec 2024 – Present

- Designed dimensional models with **10+ fact tables** and **6+ dimensions** using Kimball star schema; built a **medallion lakehouse** (Bronze/Silver/Gold) processing **30,000+ SKUs** daily at **95%+ data accuracy**.
- Engineered **50+ automated transformation pipelines** on a configuration-driven ETL framework using Polars and DuckDB — cut ETL from **4 hours to 30 minutes (87%)**.
- Built a demand forecasting engine with a **7+ algorithm** ensemble (Prophet, XGBoost, Croston, ARIMA) and ADI/CV² pattern classification for inventory optimisation.
- Delivered Power BI semantic models and Streamlit dashboards across **50+ reports** for **15+ strategic stakeholders**, reducing ad-hoc query time by **60%**.
- Improved data freshness from **48 hours to 2–4 hours (90%)**, enabling same-day supply chain decisions.
- Developed a 3-tier data quality framework (schema → business rules → statistical outliers) catching **500+ issues**, reducing analytics incidents by **70%**.

Danube Home — Dubai, UAE

Executive · Business Analytics, Supply Chain Planning — Dec 2022 – Nov 2024

- Developed Power BI dashboards and semantic data models supporting sales planning, inventory management, and procurement decisions for home-furnishings retail.
- Built Python-based data pipelines automating extraction, cleaning, and transformation across **Microsoft Fabric**, Power BI, Excel, and SharePoint.
- Applied data analytics and supply chain optimisation techniques to improve demand planning and inventory visibility.
- Partnered with supply chain planning stakeholders to translate reporting needs into reusable data models — reducing ad-hoc requests.

Al Behar Al Sabaa Aluminium & Glass Contracting — Sharjah, UAE

Business Intelligence Analyst — Feb 2020 – Nov 2022

- Designed a no-code BI system using Google AppSheet, streamlining internal processes and cross-departmental collaboration.
- Built automated data pipelines integrating supply chain data using Python and SQL, cutting manual reporting by **50%**.
- Developed Power BI dashboards and self-service analytics enabling real-time operational metrics across supply chain management.
- Implemented statistical forecasting and inventory analytics (stock levels, turnover, aging, reorder) improving operational efficiency by **15%**.

Mammut Building Systems (India) Pvt. Ltd. — Kochi, India

Trainee Detailing Engineer — Jul 2017 – Mar 2018

- Designed structural building components in AutoCAD across multiple projects — the precision-workflow habits that later translated to data pipeline design.

KEY PROJECTS

Analytics Lakehouse Architecture

Python · Polars · DuckDB · Parquet · Star schema

Dimensional data platform with Bronze/Silver/Gold layers, **10+ fact tables**, **6+ dimensions**, and semantic layers ensuring consistent business logic across analytics.

Demand Forecasting Engine

Python · Scikit-learn · Prophet · XGBoost · Streamlit

Ensemble forecasting with ADI/CV² pattern classification and automatic algorithm selection, plus inventory optimisation with safety-stock calculations — reducing stockouts by **30%**.

Transformation Layer Framework

Python · YAML · Data quality · Logging

Configuration-driven transformation framework with schema validation, data quality checks, and FULL / INCREMENTAL modes. Production-grade code with type hints and documentation.

EDUCATION

Bachelor of Science — Data Science & Applications — Jan 2023 – Present

Indian Institute of Technology, Madras (IIT Madras)

Foundation Level in Programming and Data Science – ongoing

Diploma — Mechanical Engineering — 2014 – 2017

Carmel Polytechnic College, Alappuzha, Kerala

CGPA 8.46 · First Class Distinction

CERTIFICATIONS

Google Business Intelligence Certificate — May 2024

Google Data Analytics Professional Certificate — Apr 2024
